SAP based **Management Information Network**

THE REQUIREMENT

The Top Management of the Client's Group of Companies wanted to populate their Corporate Data Warehouse and Management Information Network with the Transactional and Operational Data such as Purchase History, Receipts History, etc. extracted from the various Heterogeneous Platforms across the globe. Of all these platforms only their Chennai office was running on SAP.

THE SOLUTION

Cherrytec's SAP team studied the requirement in detail and developed customized reports to extract all the transactional and operational data from SAP database. The reports were generated as .DAT files in a pre-defined format as required by the Client.

One of the challenges during the development was to map the SAP standards with the Group Standard Coding for values such as Payment Terms, Site ID, Port Codes, Currency Codes, Material Codes, Country Codes, Unit of Measurements(UoM), Incoterms and Domestic Freight Terms.

The developed system was a great success as it helped in achieving **Uniform Reporting** from across the Group irrespective of the heterogeneous environments of the individual systems.

A detailed **User Manual** was also provided to the Client to assist them in using the system to extract required reports.

A CASE STUDY

THE CLIENT

The Client is a leading process manufacturing company located in Chennai, India offering control valves, industrial regulators and other process technologies.

ABOUT CHERRYTEC

Cherrytec is a Global Enterprise IT company providing consulting, development & maintenance covering SAP, Information Technology Infrastructure Management & Custom Applications through its offshore, onsite & dedicated delivery teams and is driven by domain expertise, commitment and Client's fulfillment.
